

ULTRAFRYER CASE STUDY

We saved Rascal's \$1,102.30 per year in gas costs.

Cajun Restaurant

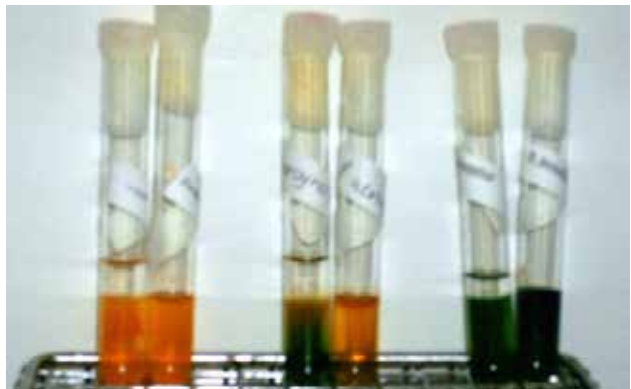

Shortening savings with Ultrafryer
Ultra-Clear Filtration.

ULTRA-CLEAR FILTRATION TESTS COMPARED TO EXISTING FRYER FILTRATION

Store management confirmed that shortening was changed every seven (7) days with Ultrafryer's Ultra-Clear Plus Filtration rather than every five (5) days with the other fryers.

Tests show visually that the Ultra-Clear Filtration keeps the oil cleaner even though the oil was changed less frequently

If shortening is changed every 5 days, it is changed 73 times per year. If each fryer cost \$50 to fill, shortening costs are \$3,650.00 per fryer per year. Rascal's has 5 fryers so shortening costs are \$18,250.00 per year.

Utilizing Ultrafryer Ultra-Clear Plus Filtration shortening is now changed every 7 days or 52 times per year.

If each fryer cost \$50 to fill, shortening costs are \$2,600.00 per fryer per year. Rascal's has 5 fryers so shortening costs are \$13,000.00 per year.

- Ultrafryer Annual Shortening Cost \$13,000.00
- Other Brands Annual Shortening Cost \$18,250.00
- Annual Shortening Savings with Ultrafryer \$5,250.00
- Annual Gas Savings with Ultrafryer \$3,640.00

TOTAL ANNUAL SAVINGS WITH ULTRAFRYER
\$8,890.00
